

WinOPS Expiration Update

It's time to update your system expiration dates again.

You must do this BEFORE 01/15/2018.

Verify in your Utilities, Setup, System Defaults, FTP tab that the Techmate IP Address is 74.95.117.57 so you can have the update download and unzip the update for you. Assuming that you have internet access and allow FTP traffic you can do the following:

For 5.X users - from Utilities pick Update. Answer both questions Yes. A message will appear telling you that your Options and/or Dates have been modified and you must re-start. Click OK. You should be logged out of WinOPS automatically. You should not have to reboot your computer.

For 6.X users - from Utilities pick Update, Update Options. Answer both questions Yes. A message will appear telling you that your Options and/or Dates have been modified and you must re-start. Click OK. You should be logged out of WinOPS automatically. You should not have to reboot your computer.

All versions - To verify that the Update went through properly login, click

Utilities, Setup, System Defaults and look at the Options tab. The options you're turned on for should now be 07/15/2018 (01/01/1900 for options you're not listed as having).

If you cannot download the files via FTP in this fashion you can also find the update at the following link and then update manually.

<http://www.opsplus.com>

WinOPS 5.X Users

Please unzip options.zip into your \WINOPS\DATABASE directory overwriting all existing files. Login and click Utilities and Update. A message will appear asking if you are sure you want to update WinOPS, answer Yes. A message will appear asking if you want to download a new options file from Techmate, answer No. A message will appear telling you that your Options and/or Dates have been modified and you must re-start. Click OK. You should be logged out of WinOPS automatically. You should not have to reboot your computer.

WinOPS 6.X- 7.X Users

Please unzip options.zip into your \WINOPS\DATABASE directory overwriting all existing files. Login and click Utilities, Update, Update Options. A message will appear asking if you are sure you want to update WinOPS, answer Yes. A message will appear asking if you want to download a new options file from Techmate, answer No. A message will appear telling you that your Options and/or Dates have been modified and you must re-start. Click OK. You should be logged out of WinOPS automatically. You should not have to reboot your computer.

All Users

To verify that the Update went through properly login, click Utilities, Setup, System Defaults and look at the Options tab.

The options you're turned on for should now be 07/15/2018 (01/01/1900 for options you're not listed as having).

If you have any questions about this just give us a call at (303) 985-9956.

Thank You
